Soft Skills

Effective communication

Team collaboration

Self-learning & ownership

Problem solving

Professional discipline

Languages

Spanish - Native

English – B2 (Intermediate –
reading, writing, speaking)

Skills

Core Stack: .NET Core, TypeScript,
Azure Functions, SQL Server,
Vue.js, Angular

Architecture: Clean & Hexagonal
Architecture, Microservices,
SOLID, REST APIs

Cloud & DevOps: Azure (Key
Vault, Pipelines, Monitor), Docker,
Kubernetes, GitHub Actions,
AWS

Integrations: RabbitMQ,
Salesforce CRM, WhatsApp API,
CyberSource, Redis

Testing: Unit, Integration & E2E

Testing, CI/CD, Agile

Profile

Software Engineer with 5+ years of experience in backend development using .NET, focused on building distributed, cloud-native systems. Strong understanding of software architecture, microservices, and clean code practices. Experienced in container orchestration (e.g., Kubernetes), CI/CD pipelines, and cloud platforms (Azure, AWS). Passionate about designing maintainable and scalable solutions within Agile teams.

Employment History

Software Developer , Ingeniería de desarrollo IDL SAS, Bogotá

JAN 2021 – MAY 2021

- Built and shipped features for a spare-parts management system supporting major automotive operations (e.g., Chevrolet, KIA).
- Optimized SQL Server performance (queries/SPs/functions, bulk ops), including inventory retrieval via linked server, reducing response times by ~30–60% and lowering intermittent failures by ~15–30%.

Tech: ASP.NET (MVC/Razor), C#, SQL Server, Entity Framework, JavaScript, AJAX/jQuery, Git

Software Developer , MVM Ingenieria de Software, Bogotá

MAY 2021 – JAN 2022

- Built backend logic and data-access components using ASP.NET + Entity Framework + Oracle SQL (queries, stored procedures, functions), improving performance and data reliability by ~10–30% in key workflows.
- Worked in layered/MVC architectures applying design patterns, improving maintainability and reducing rework by ~10–20%.

Tech: ASP.NET (MVC/Razor), Entity Framework, Oracle SQL, Azure DevOps, JavaScript, jQuery

FullStack Developer (.NET & Angular), Yuxi Global, Bogotá

JAN 2022 – AUG 2022

- Contributed to the migration/refactoring of legacy applications to Azure, improving scalability and cloud compliance while reducing operational risk.
- Implemented Redis caching for low-change reference data (rarely updated), reducing repeated DB calls and improving response times by ~10–25% in affected flows.
- Strengthened security posture by centralizing secrets/config in Azure Key Vault (credentials, secrets), reducing config-related issues and exposure risk by ~20–40%.
- Supported delivery under Scrum and contributed to Azure DevOps pipelines and automation, cutting manual operational steps by ~15–30%.
- Developed Angular components consuming REST APIs, improving maintainability and reducing UI rework/bugs by ~10–20% through cleaner patterns and consistent conventions.

Tech: .NET Framework, SQL Server (SPs), REST APIs, Angular, Git/GitLab, Jira, Azure, Azure DevOps, CloudPilot, Azure Cache for Redis, Azure Key Vault

Software Engineer / Fullstack Developer, CI&T (Clients: Caret Legal, Coca-Cola), Bogotá

AUG 2022 – JAN 2023

- For Caret Legal, contributed to the development of a legal practice management system, integrating features in monolithic and microservice architectures using .NET Core, SQL Server, and Clean/Hexagonal Architecture.
- Led the migration of key modules to Azure, implementing services such as Key

Vault, Redis Cache, Blob Storage, and Azure Functions. Developed unit tests to validate migration stability and performance.

- Utilized Azure Monitor and Application Insights for observability and diagnostics across cloud services.
- For Coca-Cola, worked as a fullstack engineer on a B2B WhatsApp chatbot (Amebot) that initiates the purchase flow, leading to a Vue.js-based shopping cart.
- Built and maintained backend services using Azure Functions (TypeScript) to integrate with external bottler providers like Andina, Bandeirantes, and Nayar.
- Developed and debugged frontend components using Angular (TS) and Vue.js, managing inventory, TTL, and ecommerce-related logic.
- Responsible for production deployments via GitHub Actions and Bitbucket Pipelines.
- Performed unit, integration, and E2E testing to ensure robust and scalable releases.
- Technologies: .NET Core, Azure Functions, Azure Key Vault, Redis, Blob Storage, Azure Monitor, Application Insights, Angular, Vue.js, TypeScript, GitHub Actions, Bitbucket, Infobip, WhatsApp Business API, Azure Boards, Clean Architecture.

Software Engineer, Softtek(Clients: Kaplan, Bisk), Bogotá

JAN 2023 – PRESENT

- Delivered features for academic/e-commerce platforms (e.g., Kaplan and university systems by Bisk), supporting high-availability enrollment and student workflows.
- Built distributed backend services using .NET Core + SQL Server + RabbitMQ in a microservices setup (Clean Architecture/MVC), improving maintainability and reducing rework by ~10–20%.
- Integrated external university APIs and payment providers (CyberSource, InterPayments), improving payment/workflow reliability and reducing integration-related incidents by ~15–30%.
- Implemented and maintained scheduled jobs/schedulers for automated processing (e.g., background tasks, retries, batch operations), reducing manual ops and reprocessing effort by ~20–40%.
- Improved observability using structured logging and monitoring/insights (e.g., Application Insights/Cloud logs), cutting issue investigation time by ~20–40% and improving system stability by ~10–25%.
- Containerized services with Docker and supported CI/CD with Azure Pipelines/Azure Repos deploying to AWS, reducing deployment friction and manual steps by ~15–30%.

Tech: .NET Core, SQL Server, RabbitMQ, Microservices, Clean Architecture, Docker, Azure Pipelines, Azure Repos, AWS, Salesforce CRM, CyberSource, InterPayments, Application Insights/Cloud logging, Git/GitLab, Jira

Education

Systems Engineer, Universidad Central, Bogotá

2018 – PRESENT

English (B2 – Intermediate), Universidad Central, Bogotá

2022

Courses

Certified in Scrum project management fundamentals, covering Agile principles and team collaboration practices, CertiProf

MAR 2021 – APR 2021
